Forcei um erro na def soma:

```
PS C:\Users\Ash\Downloads\CI e CID> pytest .\test_calculadora.py
+ CategoryInfo          : ObjectNotFound: (pytest.String:[]), CommandNotFoundException
+ FullyQualifiedErrorId : CommandNotFoundException

PS C:\Users\Ash\Downloads\CI e CID> python -m pytest .\test_calculadora.py
===== test session starts =====
platform win32 -- Python 3.14.7, pytest-9.1.1, pluggy-1.6.0
rootdir: C:\Users\Ash\Downloads\CI e CID
collected 5 items

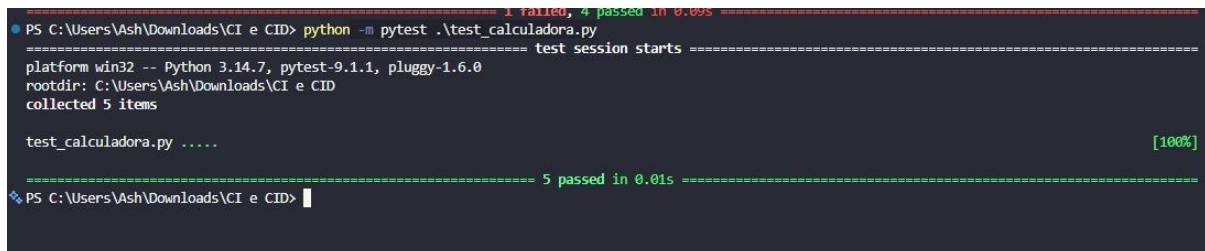

test_calculadora.py F.... [100%]

===== FAILURES =====
test_somar

  def test_somar():
  >   assert somar(2, 3) == 5
  E       assert -1 == 5
  E       + where -1 = somar(2, 3)

test_calculadora.py:5: AssertionError
===== short test summary info =====
FAILED test_calculadora.py::test_somar - assert -1 == 5
===== 1 failed, 4 passed in 0.09s =====
❖ PS C:\Users\Ash\Downloads\CI e CID>
```

Após concertar este erro, voltou a funcionar normalmente:

```
===== 1 failed, 4 passed in 0.09s =====
❖ PS C:\Users\Ash\Downloads\CI e CID> python -m pytest .\test_calculadora.py
===== test session starts =====
platform win32 -- Python 3.14.7, pytest-9.1.1, pluggy-1.6.0
